

Securing our future water supply in Cessnock

Hunter Water is investing \$5 million in new infrastructure to improve the water supply system in the Cessnock region. This upgrade forms part of the first stage of a four stage upgrade.

The upgrade work involves construction of a 6.5km new underground pipeline, through Weston, Abermain, Bellbird Heights and into Cessnock.

Construction will begin in February 2010 and is expected to be completed by September 2010.

There will be some minor traffic disruptions during this time. Hunter Water appreciates your cooperation during these essential upgrades.

For site related issues please call the contractor, Delcare Constructions on 4367 2863.

For more information about the four stage Cessnock Water Supply Upgrade program, please call Hunter Water on 4979 9547.

More information about the project is available on the Hunter Water website at **www.hunterwater.com.au**
